

# Guardrail Reflectors

## Guardrail Reflectors

Illuminate invisible guardrails at night with bright reflective markers that provide clear delineation. Pexco's guardrail markers are manufactured with engineering resins and are designed to endure the rigors of construction work zones and permanent installations. We can manufacture reflectors using any grade or color of reflective sheeting in order to meet your local requirements.

Typical Applications include:

- W-beam guardrails
- Wood and steel guardrail posts
- Bridge approaches
- Hills, curves, gores, off-ramps

### Ask for Pexco's Unique "Gator Jaws" Hinge!

Traditional rigid guardrail reflectors take a real beating in winter causing breakage, cold-shock and loss of reflectivity. Our "Gator Jaws" polyurethane hinge offers a chemical and mechanical bond for greater strength and durability.

Hinge available on our **I-Flex**, **U-Flex** and **S-Flex** Guardrail Reflectors and on our **T-9**, **T-12** and **T-16** Barrier Wall Reflectors.

### S-Flex

4" x 8.75" reflector with our unique "Gator Jaws" flexible polyurethane hinge that bends easily and bounces back. The S-Flex mounts to wood or steel guardrail posts. Designed for cold weather environments to prevent loss of reflective tape during subzero temperatures.

### ELD

*(Enhanced Linear Delineation)*

Create a ribbon of light to safely guide drivers at night using Butterfly markers (see below) and our new **Hi-Viz Flex Tab** (page 11). Ask us for details.

***New Application!***

### FG 427, 527

Both markers are 27 inches long and accommodate 36 square inches of sheeting. Can be mounted on guardrail posts positioning the reflectors 48 inches above the road surface.

Glue On

### Butterfly

Guardrail reflectors fit perfectly inside W-beam guardrails.

### Fat Cat

Oversized rigid guardrail marker measures 4"x15".

### I-Flex

Fits over steel I-beam guardrail posts with "Gator Jaws" polyurethane hinge.
